EXPERIENCE

- Homeppl

since May 2020

As a consultant I've helped Homeppl team migrate django application to microservices architecture.

- PatientSource

October 2019 - April 2020

As a consultant I've helped PatientSource team introduce devops-centered development process and support them with day-to-day development process.

- Netguru

October 2018 - September 2019

Developing platform managing and optimising online advertising campaigns. Collaborating with London based advertising agency. Supporting R&D initiatives, estimating projects, presales activities, participating in scoping sessions and expert calls, code reviews.

Technologies: Python, Django, Postgres, Docker, Terraform, CloudFormation, Zappa (serverless), AWS services, BigQuery, Git

- WhiteAster

January 2018 - October 2018

Integrating machine learning solutions. Collaborating with New York based fintech company providing daily cashflow to Amazon suppliers. Technologies: Python, Django, Flask, TensorFlow, Pandas, NumPy, SciPy, JavaScript, Vue.js, AWS services, Git

- Freelancing

October 2016 - January 2018

Developing e-commerce platforms, content management systems, web scraping scripts and payment gateways. Some projects I worked on: Project management system and lead generation scripts for advertisement company Q-Graf. Payment system for Tylicz ski resort. Technologies: Python, Django, Wagtail, django-payments, Saleor, Docker, Javascript, Git
